SUMMARY

Graduate student in Applied Data Analytics at Boston University and Contract Specialist at NAVSEA. Hands-on experience building big data pipelines in PySpark, training and evaluating machine learning models in Spark ML, and working in AWS cloud environments, combined with a professional background in federal contracting, documentation and detail-oriented analysis.

EXPERIENCE

Contract Specialist, Naval Sea Systems Command (NAVSEA) | Washington, DC | Present

- Support the federal acquisition process for Navy programs, from requirements through award and administration
- Prepare, review and maintain contract documentation in line with federal acquisition regulations
- Coordinate with program teams and vendors to keep actions accurate and on schedule

Founder, JUST WANNA STAY | Present

- Building a comfort-first, neutral-toned loungewear brand from concept to pre-launch
- Leading brand development, website (Squarespace), social media and the preorder launch plan for collection NUDE 001

EDUCATION

M.S. Applied Data Analytics, Boston University, Metropolitan College | December 2026
Relevant coursework: Big Data & Cloud Analytics for Business (AD688)

PROJECTS

- **Data Scientist Careers: Skill Gaps & Prediction**: skill gap analysis and Spark ML salary modeling for NAICS 5417 job postings (team project)
- **Salary Prediction with Spark ML**: feature engineering pipeline; linear, polynomial and random forest regression compared on RMSE, R-squared, AIC and BIC
- **Cloud Foundations on AWS**: EC2, VPC, IAM, S3 and RDS labs; highly available architecture design

SKILLS

Languages: Python, SQL
Big Data: Apache Spark, PySpark, Spark ML
Cloud: AWS (EC2, VPC, IAM, S3, RDS, CloudWatch)
Visualization: Plotly, Seaborn, Matplotlib
Tools: Git, GitHub, Quarto, VS Code, Jupyter, Linux
